Professional Summary

Junior Full-Stack Developer & Data Analyst with hands-on experience building responsive web applications, designing relational databases, and using AI-assisted development tools to accelerate problem-solving. I build full-stack web applications using Python, Django, and Bootstrap.

I am a reliable, autonomous professional who has worked a dedicated overnight schedule for the past 14 years. Alongside my operational experience. I am looking for a remote, overnight role in Technical Support or Web Operations where my nocturnal schedule, independent problem-solving skills, and technical background can add immediate value to a 24/7 team.

Technical Skills

Languages & Frameworks*: Python, Django, SQL, PostgreSQL, MySQL, HTML5, CSS3, Bootstrap 5, JavaScript & React (Courses in progress).*

Data Analytics: *Advanced Excel, Power BI, Pandas, NumPy*

Tools: *Git, GitHub, Copilot, Gemini, ChatGPT (AI-assisted scripting)*

Projects

Mini Stellar Encyclopedia — *Python, Django, PostgreSQL, Bootstrap 5, HTML/CSS*

• Built a full-stack star-type encyclopedia with a relational PostgreSQL database.

• Designed a mobile-first UI and custom layout mechanics.

• Integrated AI-assisted JavaScript features for interactive components.

Personal Interests Log App — *Python, Django, PostgreSQL, Bootstrap 5, HTML/CSS*

• Developed a customizable logging system for user-generated data.

• Engineered optimized relational database structures.

• Used AI debugging tools to isolate logic issues and improve development speed.

Work Experience

Household Manager & Caregiver

Dieudonne Home | Jeanerette, LA

January 2008 to Present

Long-term overnight role involving operations, scheduling, documentation, and independent task management.

Merchandiser, Designer & Installer

- Supported event and holiday installations with attention to detail and aesthetic consistency

Kitchen Designer / Vignette Installer / Sales Specialist

The Home Depot / Office Depot | Baton Rouge, LA

December 2005 to December 2006

- Installed product vignettes to highlight featured merchandise and improve customer engagement.
- Created visually appealing product presentations using layout, color, and design principles. • Supported sales teams with promotional setups, seasonal resets, and department organization.
- Assisted customers with product selection and provided knowledgeable service.
- Designed functional kitchen layouts based on customer needs, space requirements, and product specifications.

Store Manager

Subway | Baton Rouge, LA

August 2005 to December 2005

- Managed daily store operations including scheduling, inventory control, and workflow coordination.
- Oversaw hiring, training, and performance management for team members.

- Ensured compliance with food safety standards, sanitation requirements, and brand guidelines.
- Delivered consistent customer service and resolved issues to maintain store satisfaction. • Monitored sales trends and implemented strategies to improve efficiency and profitability.

Store Merchandise Manager / Visual Lead

The Gap, Inc. () | Baton Rouge & Lafayette, LA

July 1996 to February 2001

- Installed visual displays and maintained brand presentation standards throughout the store.
- Assisted customers with product selection, styling guidance, and customer service needs.
- Supported merchandising tasks including stock organization, floor resets, and promotional setups.
- Ensured consistent visual quality and contributed to a positive shopping experience.
- Directed merchandising strategies and maintained brand presentation standards across the store.
- Coordinated seasonal resets, product placement, and promotional floor layouts.
- Trained staff on visual standards, customer engagement, and inventory organization.
- Monitored stock levels and collaborated with management to optimize product flow.
- Supported daily operations through planning, scheduling, and workflow coordination.

E.R. Admission Representative & Data Entry

Dauterive Hospital | New Iberia, LA

January 1991 to August 1996

- Processed patient admissions and verified essential information with accuracy and confidentiality.
- Operated multi-line PBX communication systems in a fast-paced emergency environment. • Performed high-volume data entry and maintained organized patient records.
- Supported administrative workflows and collaborated with medical staff to ensure smooth operations.
- Provided calm, professional assistance to patients and families during urgent situations.
